# Vincom Retail Joint Stock Company (HOSE: VRE)

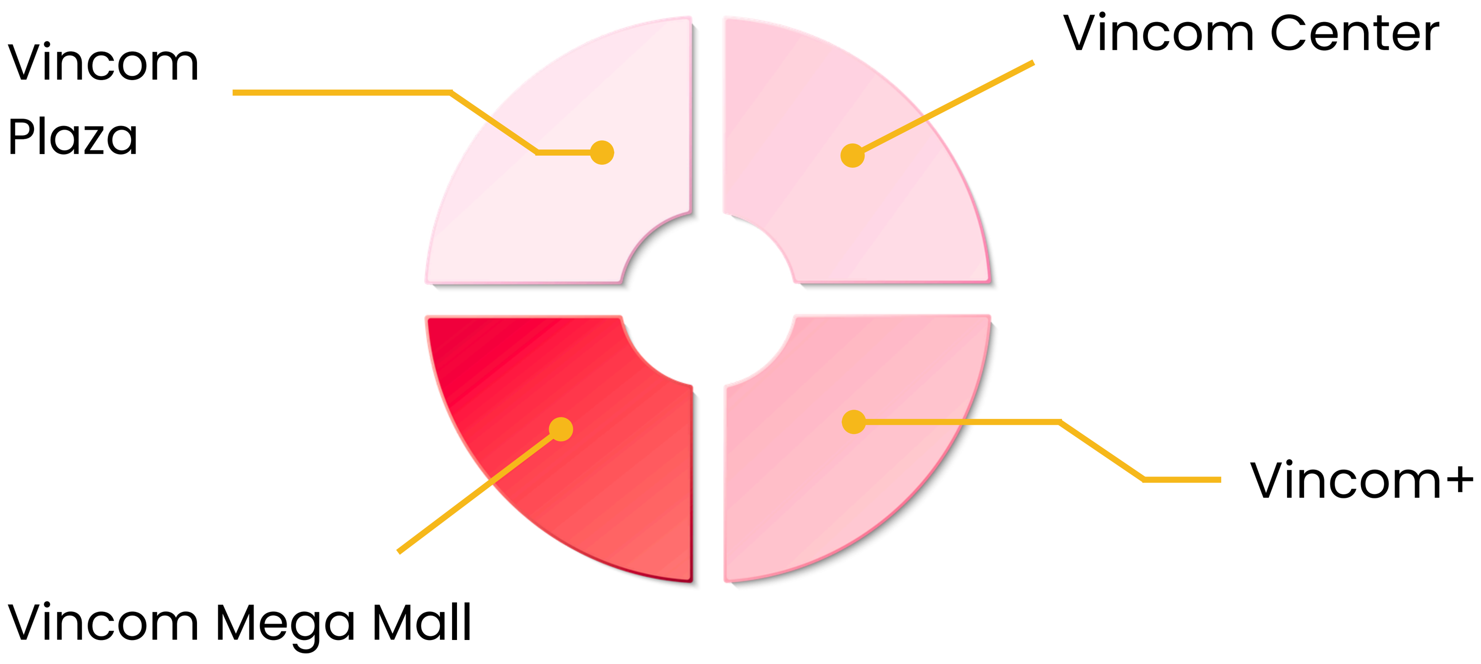
***Industry:*** *Real Estate/ Real Estate Management and Development*

| Market Capitalization | Total Revenue | P/E | EPS |
|---|---|---|---|
| 68,396.78 BILLION VND | 8,837 BILLION VND | 11.86 | 2,837 |

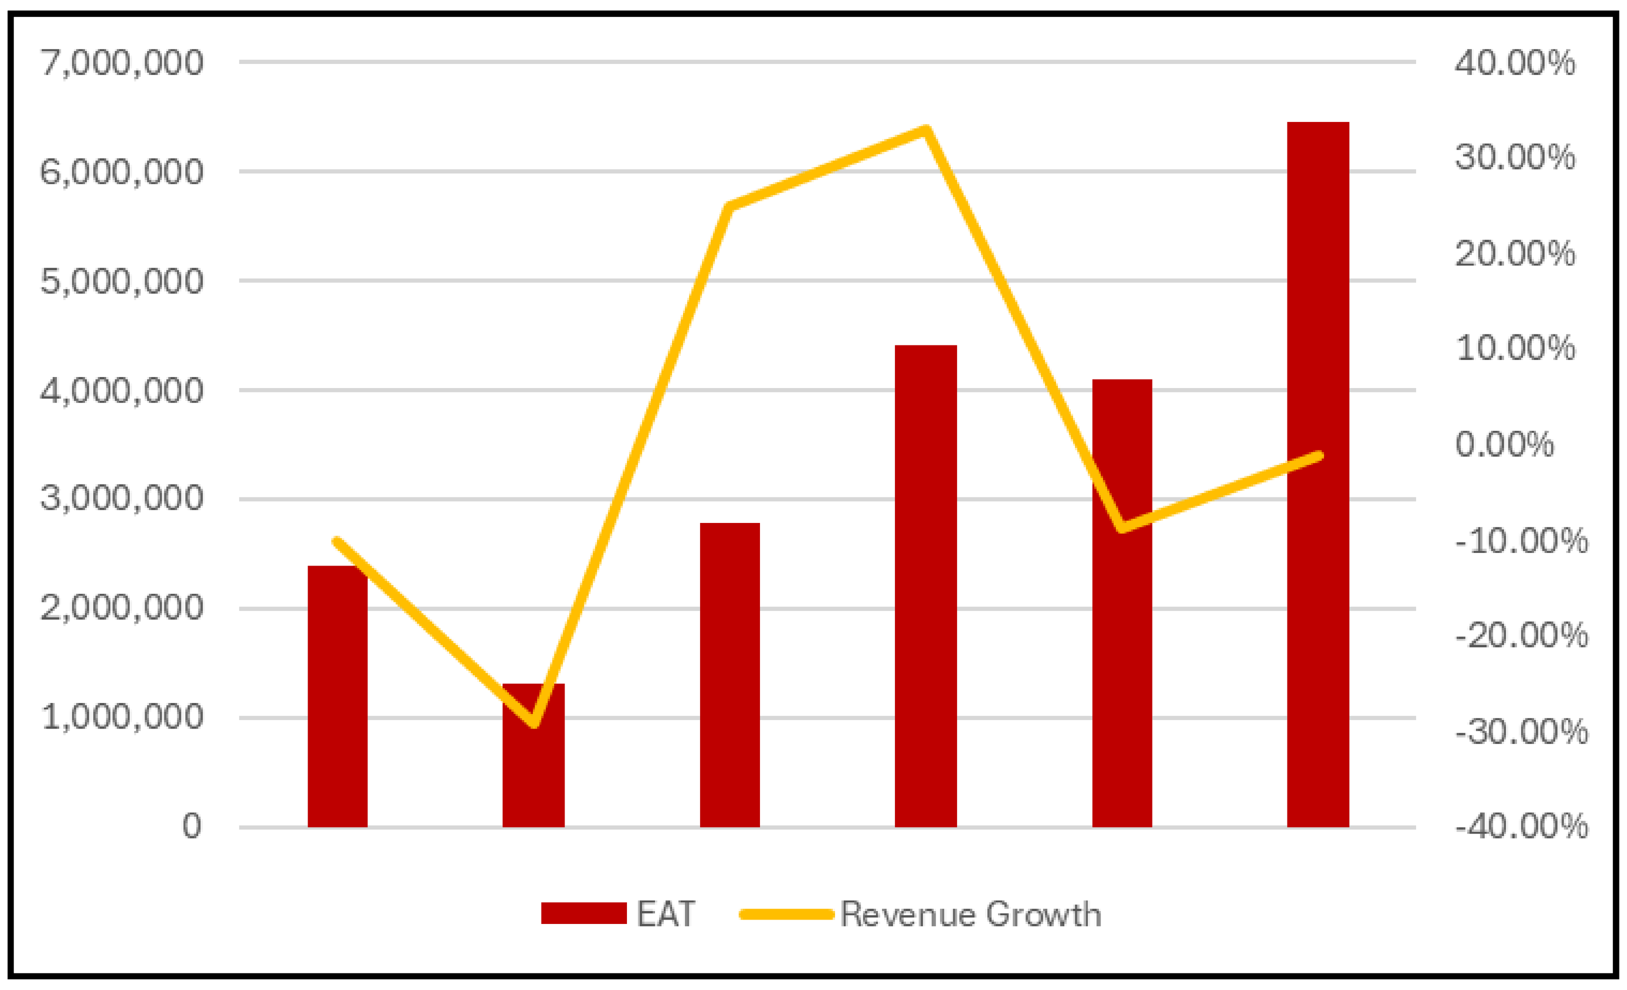
## Market position

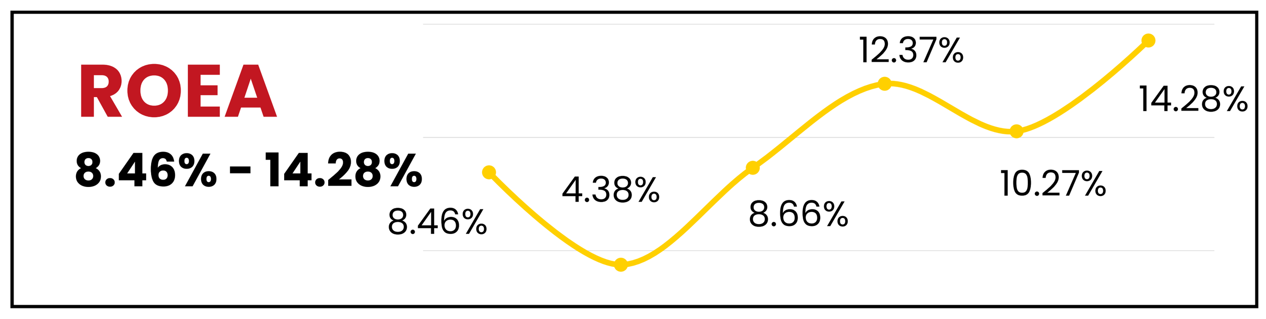
VRE is one of the leading companies in Vietnam, with a business model **focused on investing in, developing, and operating shopping malls.**
Vincom Retail launched 5 new shopping malls during the year, expanding its network to **88 malls across 48 provinces and cities nationwide.**
The company's development strategy is to maintain its position as the number one retail real estate developer in Vietnam in terms of coverage and total retail floor area

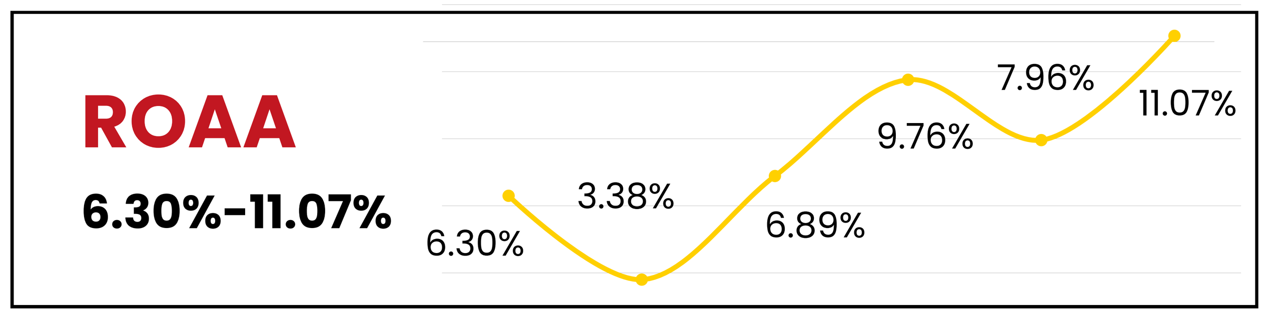
## Business system

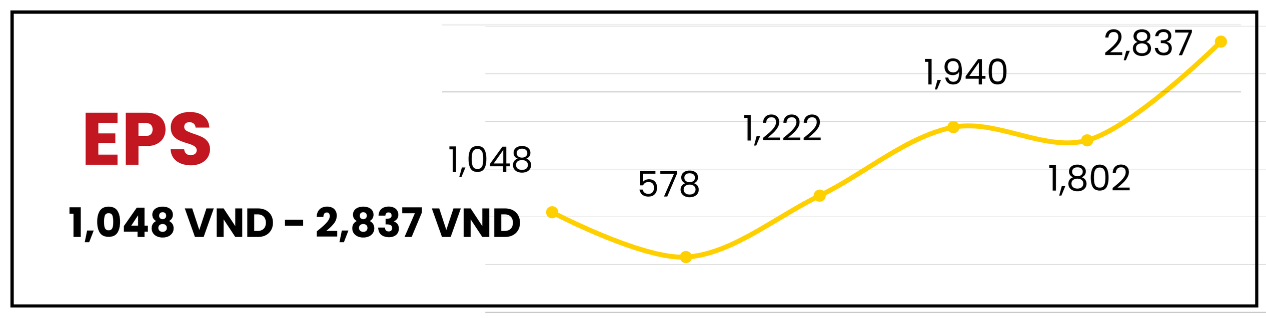


## Financial performance









**Vincom Retail maintains a relatively strong and stable financial position**, supported by consistent revenue growth of approximately 20–25% annually and a steady source of income from retail leasing activities. The company's ROE of 9.77% and ROA of 7.42% reflect efficient capital utilization and solid operational performance within the commercial real estate sector. In addition, an EPS of 2,837 VND demonstrates good profitability, while a P/E ratio of 11.86 suggests that the stock is currently valued at a reasonable level compared to its long-term growth potential. Overall, VRE's financial health is considered stable, supported by its large retail property network, strong market position, and sustainable business strategy.

## Medium and long-term prospectus

### Expansion of Shopping Mall Network

The continued development and expansion of shopping malls across various provinces and cities help VRE maintain stable revenue streams from leasing and retail services.

### Recovery of the Retail Market

As the economy improves and consumer spending increases, demand for retail space in shopping malls is expected to rise, supporting occupancy rates and rental income growth.

### Sustainable Development Strategy

REE focuses on essential sectors with stable cash flows and long-term profitability, while optimizing its investment portfolio and implementing effective management, helping the company maintain its competitive advantage.

## RISK TOLERANCE

This stock is considered to have a moderate level of risk due to its relatively stable financial foundation and recurring revenue streams from retail leasing operations.
The retail and commercial real estate industries are highly cyclical and are influenced by economic growth and consumer spending. Therefore, during economic downturns, occupancy rates and rental revenue may be negatively affected. However, VRE adopts a prudent investment strategy by focusing on prime commercial locations and optimizing its shopping mall portfolio, helping to minimize risks and maintain stable business performance.

## TIME HORIZON

**Suitable for medium- to long-term investors (approximately 3–5 years)**

This is due to the nature of the commercial real estate and retail sectors, which typically involve long development cycles and depend heavily on economic growth and consumer spending trends.
