Market position

EVF is one of the leading non-bank financial institutions in Vietnam, specializing in corporate lending, investment activities, and capital market services. Originally established to support financing needs within the energy sector, the **company has gradually expanded its customer base across multiple industries while maintaining strong expertise in project financing and corporate credit.**

EVF continues to strengthen its market position through access to international funding sources and industry recognition. The company **was also recognized at the FChoice 2025 Awards, highlighting its reputation and growing presence within Vietnam’s financial services sector.**

Financial performance

The company’s financial performance was **volatile but improved significantly during 2020–2025**. Revenue growth **fluctuated, declining sharply in 2023 before rebounding strongly in 2024 and maintaining positive growth in 2025**. Earnings After Tax increased steadily from VND 228 billion to VND 894 billion, demonstrating strong profit growth. Profitability ratios also improved, with ROEA reaching 9.47% and ROAA rising to 1.25% in 2025. **Although EPS experienced fluctuations, it achieved its highest level of 1,176 in 2025. Overall, the company showed strong financial resilience and a positive recovery trend, supported by improving profitability and shareholder returns.**

TIME HORIZON

SUITABLE FOR MEDIUM- TO LONG-TERM INVESTMENT (APPROXIMATELY 3–5 YEARS).

This timeframe allows investors to benefit from the company’s growth strategy, expansion in corporate and green financing, and the long-term development of Vietnam’s economy. Holding the stock over a longer period also helps mitigate the impact of short-term market fluctuations and business cycle volatility.

RISK TOLERANCE

Moderate level of risk.

The company operates in the financial sector, which is exposed to credit risk, interest rate fluctuations, and macroeconomic conditions. However, its diversified business model, focus on corporate financing, and growing presence in green finance help mitigate some of these risks. Investors seeking balanced growth opportunities with manageable risk may find EVF an appropriate investment.

Medium- and Long-Term Outlook

Expansion of SME and Sustainable Financing

The USD 25 million funding package from the OPEC Fund for International Development provides EVF with additional capital to expand lending activities, particularly for SMEs and sustainable development projects, supporting long-term credit growth.

Growth of Corporate Lending and Investment Activities

As Vietnam’s economy continues to expand, increasing demand for corporate financing, investment products, and capital market services is expected to support EVF’s revenue and profit growth.

Digital Transformation and Financial Ecosystem Development

EVF continues enhancing its digital capabilities and diversifying financial products, helping improve operational efficiency, strengthen competitiveness, and create sustainable long-term growth opportunities.
