Market position

VGI holds a leading position in the telecommunications industry across several emerging markets in Asia and Africa through its international operations. Backed by Viettel Global and the broader Viettel Group ecosystem, the company benefits from strong technological capabilities, extensive network infrastructure, and a large subscriber base. Its presence in multiple high-growth markets provides a competitive advantage and supports long-term expansion potential.

In addition, VGI has established strong market positions in many of its operating countries, with several subsidiaries ranking among the leading telecom providers in their respective markets. The company's ability to offer affordable services, invest in advanced network technologies, and expand digital ecosystems beyond traditional telecommunications strengthens customer loyalty and enhances its long-term competitive advantage. This diversified international footprint also reduces dependence on any single market and supports sustainable growth.

Financial performance

VGI recorded outstanding growth during the 2020–2025 period. **Revenue maintained a stable upward trend**, exceeding 25% growth in the last two years. **Earnings after tax surged significantly from VND 347 billion in 2021 to VND 11.251 trillion in 2025, driving EPS up to VND 3,056 per share.** Profitability indicators also improved substantially, with **ROEA and ROAA** reaching 23.65% and 12.84%, respectively, in 2025. These results indicate that VGI has entered a strong growth phase, characterized by increasing operational efficiency and enhanced profit-generating capability.

TIME HORIZON

SHORT TO MEDIUM TO LONG -TERM INVESTMENT HORIZON

VGI is suitable for long-term investors due to its exposure to high-growth emerging markets, strong expansion in digital services, and rapidly improving profitability. While short-term volatility may arise from currency, regulatory, and geopolitical risks, the company's growing scale, improving returns, and favorable industry trends support sustainable value creation over the long run.

3 TO 5 YEARS

Medium and long-term prospectus

Expansion of digital services and telecommunications markets

VGI continues to expand its telecommunications and digital service ecosystem across emerging markets in Asia and Africa. Increasing demand for mobile data, digital payments, and digital transformation services provides significant growth opportunities.

Strong growth potential in emerging markets

The company's operations are concentrated in developing economies with low telecommunications penetration and rising smartphone adoption. These markets offer substantial room for subscriber growth and increased revenue per user over the long term.

Improving profitability and operational efficiency

Recent years have seen a significant improvement in VGI's profitability, driven by higher revenue growth, expanding customer bases, and stronger operational efficiency. As its overseas markets mature, the company is expected to generate more stable cash flows and sustainable earnings growth.

RISK TOLERANCE

MEDIUM TO HIGH RISK TOLERANCE

Although the company has demonstrated strong revenue growth and significant improvements in profitability, its operations are concentrated in emerging and frontier markets, which expose it to risks related to economic conditions, political stability, regulatory changes, and foreign exchange fluctuations. However, VGI's strong market position, expanding subscriber base, and improving financial performance help mitigate some of these risks and support its long-term growth potential.
